

ULTIMATE WINTER PREPARATION GUIDE

INSPECTION CHECKLIST:

- ☐ Inspect tread depth — minimum 4/32" on steer tires, 2/32" on all others
- ☐ Check tire pressure daily — cold temps reduce PSI
- ☐ Inspect wheel ends for corrosion and proper torque on lug nuts
- ☐ Drain air tanks to remove water and prevent freezing
- ☐ Check air dryer operation and replace cartridges if due
- ☐ Inspect brake lines for cracks, chafing or moisture
- ☐ Inspect air lines for leaks or brittleness
- ☐ Apply cold weather grease on fifth wheel, landing gear and hinges
- ☐ Lubricate locks, hinges and latches to prevent freezing
- ☐ Apply anti-gel additive to diesel
- ☐ Wash down undercarriage thoroughly each week to remove road salt

TIP #1

Maintaining temperature controls on refrigerated or heated units will prevent freezing cargo and damage to perishable goods.

EQUIPMENT LIST

Suggested equipment to have in truck:

- Shovel & sand/salt
- Jumper cables or booster pack
- Road flares or reflective triangles
- Winter gloves
- Insulated coveralls
- Flashlight

TIP #2

Check condition of fire extinguisher and first aid kits.
